Bar Code Registration System Application

1. Barcode registration system

(Please indicate required quantity and total amount.)

Item	Quantity	Unit price (5% consumption tax is included)	Total
Basic system charge	1 set	¥ 21,000 (borne by the Secretariat)	¥ 0
Rental charge for barcode reader	1 reader	¥ 10,500 (borne by the Secretariat)	¥ 0
Additional reader(s)	__ reader(s)	¥ 8,400 (per/reader)	¥
Total	__ reader(s)		¥

2. Ways of delivery (Please mark for your choice.)

Item	Charge (5% Consumption Tax is included)
<input type="checkbox"/> a. Data on visitors (CD-R)	¥47/per 1
<input type="checkbox"/> b. List on visitors	¥52/per 1
<input type="checkbox"/> c. Data on visitors (CD-R) + List on visitors	¥63/per 1

Neonet Inc. will deliver the above one week later after the Show.

Neonet Inc., which is in charge of the bar code registration system, will send the bill to exhibitors.

Power Supply Application

Please apply total amount of power supply you need including the amount provided by free of charge.

Power Mode	Voltage	Frequency	Capacity Applied for
Single-phase 2-wire AC	100V	50Hz	kW
Single-phase 2-wire AC	200V	50Hz	KVA (kW)
Triple-phase 3-wire AC	200V	50Hz	KVA (kW)

The following power facilities and capacities are available for exhibition booths:

Single-phase 100V/200V power facilities:

- (1) The Show Management Secretariat provides a single-phase, 100V, 200V, 50Hz power supply (with one power outlet) for each exhibitor for demonstration and illumination of exhibits.
- (2) Each exhibitor is equipped for minimum 1kW power capacity/booth at no extra charge.
However, in case of excess usage, extra power supply is available at the cost of ¥7,350/kW (including 5% consumption tax).

Change in Power Supply Application

This Application Form should be submitted only when changing your electrical power capacity.

- Power supply already ordered:

Power Mode	Voltage	Frequency	Capacity Required
Single-phase 2-wire AC	100V	50Hz	kW
Single-phase 2-wire AC	200V	50Hz	KVA (kW)
Triple-phase 3-wire AC	200V	50Hz	KVA (kW)

- Please change the power supply to the following:

Power Mode	Voltage	Frequency	Capacity Required
Single-phase 2-wire AC	100V	50Hz	kW
Single-phase 2-wire AC	200V	50Hz	KVA (kW)
Triple-phase 3-wire AC	200V	50Hz	KVA (kW)

Installation Diagram

Signed: _____ Date: _____

- Note**
1. Diagrams must be submitted by September 8.
If diagrams are not received by the deadline, power transmission will be delayed or stopped.
 2. Wiring, etc., must comply with the standards set down by the Tokyo Electric Company.
 3. Appliance capacities must be recorded as follows: fluorescent lighting 40W -FL40W, Lighting 60W - L60W, Socket 100W-(1)100W.
 4. Fluorescent lighting and mercury lighting, etc., increases the total capacity rating by 50%.
 5. Fluorescent lighting and mercury lighting, etc., uses high frequency power. When the use of low frequency power is unavoidable, a socket should be installed according to the instructions from the Show Management Secretariat.
 6. When using a motor, ensure that the socket installed is suitable for the load-requirement.
 7. When using an alternating or dual switch, indicate clearly on the diagram.
 8. If it is not possible to include the wiring diagram on this form, use a separate sheet titled "Additional Electrical Power Work Installation Diagram" and submit it together with this Form.
 9. The booth must be equipped with a power cut-out switch for safety reasons, and this switch should be located on the rear wall of the booth on the right hand side (when facing the booth) at a height of 100cm from the floor. However, exhibitors who have multiple booths should indicate the location of this switch on the wiring diagram.
 10. Kogeisha Co., Ltd. Will submit the diagram for the packaged booth applicant.

Deadline: September 22 (Fri.)

Early Power Transmission, Turning Electricity 24 Hours, Extension for Stopping Power Transmission to the Booth Application

1. Early Power Transmission Application

Power transmission to the booths is activated from Monday, October 2. The early power transmission requires separate installation work, therefore, all the cost should be borne by the exhibitors. In some cases, we may not be able to accept requests due to working conditions.

Wishing power transmission to the booths(s)	From : _____ a.m/p.m., October _
Remarks	

2. Turning Electricity 24 hours Application

Please take care for the equipment by exhibitor. Each equipment should be single-wiring.

Wishing power transmission to the booths(s) for 24 hours	Name of the equipment	Voltage	Electricity Capacity
October to October		100 V	W
October to October		100 V	W
October to October		200 V	VA (W)
October to October		200 V	VA (W)

3. Extension for Stopping Power Transmission to the Booth(s)

Power transmission will stop at 4:30 p.m. on Friday, October 6. Exhibitors requiring the extension for stopping power transmission to the booth should apply as follow:

Time for the extension for stopping power transmission to the booth(s)	Until : _____ p.m., Friday, October 6
Remarks
